CUSTOMER SUCCESS STORY

Mural Architect

Centralized Design File Storage & Remote Access

THE BUSINESS CHALLENGE

Large architecture and design files had to be shared across users, while the organization also required secure remote access and visibility into storage health.

SOLUTION IMPLEMENTED BY AXIOM

- Synology NAS as the central repository for design files
- Storage configuration supporting concurrent authorized access
- VPN connectivity for remote access
- Centralized infrastructure and storage monitoring
- Support for casting and streaming/presentation requirements

BUSINESS OUTCOME

The implementation established a common project-file repository, remote access through VPN and supporting presentation capabilities.

PROJECT VALIDATION & SCOPE

This case study reflects the documented solution implementation and project description for Axiom's architecture-sector portfolio.

SHORT WEBSITE SUMMARY

Problem: Needed shared access to large design files, secure remote connectivity and support for presentation workflows.

Solution: Synology NAS, secure VPN access, centralized monitoring and casting/streaming support.

Outcome: Centralized large-file storage, concurrent authorized access and supported remote and presentation workflows.
